Arcade Technician

Description

The Arcade Technician must be able to install, maintain and repair both mechanical and circuitry issues in arcade game machines. This involves transporting machines and assembling them by using meters, electrical parts, hand tools and soldering irons. The Arcade Technician installs and sets up new games and equipment. Arcade Technicians report equipment defects for proper warranty handling and responsible for ensuring warranty parts and supplies are returned and received from the manufacturer. Arcade Technicians use manuals and wiring diagrams to keep machines in proper order and carry out various diagnostic tests and must be able to identify the most common problems with components like controls and audio systems.

As an Arcade Technician, it is your responsibility to assist other Team Members and interact with guests providing excellent customer service.
